REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 1-6 and 9-10 is the inclusion of the limitations of "a plurality of image formation units therein each of which serves to perform a printing operation of an image data on a printing sheet, said plurality of image formation units being used in parallel to improve printing speed of the printing machine; a printed sheet transportation unit which serves to transport the printing sheets having been printed from each of said image formation units to a common output location; a computer readable ROM having an error classified table stored therein in which errors that can occur in said printing machine are classified, said classified table including at least one error on an occurrence of which a printing operation of at least one of said image formation units for the image data can be continued while a printing operation of another of said image formation units for the image data must be halted, and at least one other error on an occurrence of which printing operations of all of said image formation units for the image data must be halted; and a control unit comprising a CPU connected to said ROM, said CPU having an error judgment program executed thereon which computer program judges whether or not a detected error is an error with which a printing operation of at least one of said image formation units can be continued while a printing operation of another of said image formation units must be halted, or an error with which printing operations of all of said image formation units must be halted." It is these limitations found in each of the claims, as they are claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes these claims allowable over the prior art.

Art Unit: 2853

The primary reason for the allowance of claims 7-8 is the inclusion of the method steps being “A method of reporting an error in a printing machine having a plurality of image formation units therein each of which serves to perform a printing operation of an image data on a printing sheet, said plurality of image formation units being used in parallel to improve printing speed of the printing machine, and a printed sheet transportation unit which serves to transport the printing sheet from each of said image formation units to a common output location; an error judging step of judging whether or not the detected error is an error with which the printing operation of at least one of said image formation units for the image data can be continued while a printing operation of another of said image formation units for the image data must be halted or an error with which the printing operation of all of said image formation units for the image data must be halted; an error reporting step of reporting the error as detected in said error detecting step as well as information of whether or not the printing operation can be continued by said printing machine with the error.” It is these steps found in each of the claims, as they are claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
